

Edgify AI technology for supermarkets

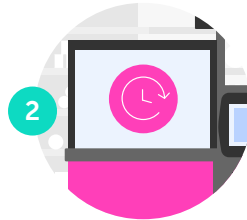

Using Edge AI and Computer Vision, Edgify can, with near 100% accuracy, identify non-barcoded items such as fruit, vegetables, bakery products and other fresh produce.

Six benefits for supermarkets

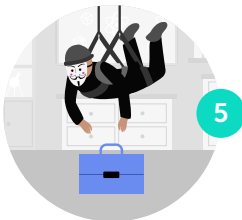

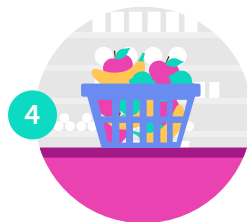

1 More accurate & less friction
Near 100% item recognition accuracy. Less human support needed.

2 Less time at tills
Quicker checkout for customers and cashiers.

3 Less loss and shrinkage
No accidental or intentional errors.

4 More eco-friendly
Loose items can be scanned together. Less plastic needed.

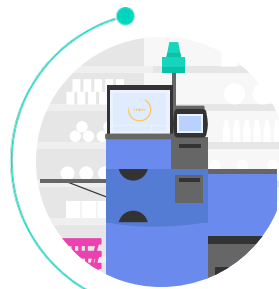

5 Optimum data security
Cloudless solution. GDPR compliant.

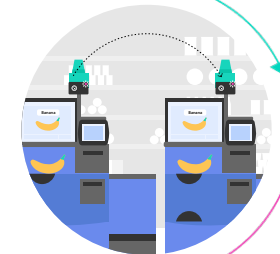

6 More Covid-safe
Minimal touch.

How does Edgify work?

Edgify uses machine learning on edge devices.

The edge devices share information for training.

Learning on a continual loop between devices or stores.
